

Ryan Reeves, MD
Physical Medicine and Rehabilitation

As a spine-specialized, fellowship-trained physical medicine and rehabilitation physician, Dr. Ryan Reeves provides patients with interventional back and neck pain relief through nonsurgical methods. As an attending physician at Spine Team Texas, he plays an integral role in identifying a patient's needs and working with the physical therapy clinical staff, his fellow physical medicine and rehabilitation physicians and the neurosurgeons to determine the most effective treatment plan.

Dr. Reeves studied as an interventional spine fellow at Orthopaedic Spine Specialists in York, Penn. Prior to completing his fellowship, Dr. Reeves had a busy practice at Springfield Spine and Sport, Inc., focusing on the treatment of neck and back ailments.

As a resident, Dr. Reeves volunteered as the team physician for several sports teams and provided medical coverage for a number of sporting events for the disabled, including sled hockey, quad rugby and quad baseball.

Dr. Reeves completed his internship at Detroit Medical Center and his residency in physical medicine and rehabilitation at Ohio State University. He earned his medical degree and his undergraduate degree in biology from Wayne State University in Detroit.

Dr. Reeves has many professional affiliations, including ones with the following organizations: North American Spine Society, International Spine Intervention Society, American Medical Association, the American Academy of Physical medicine and Rehabilitation and the Physiatric Association of Spine, Sports and Occupational Rehabilitation.
